

Digital Degrowth

“*Digital Degrowth* addresses new challenges emerging from the digitalisation of every sector of our lives, impacting our sovereignty and democracy. A vital book for anyone concerned about justice and equality, and about the limitless extraction of the Earth’s resources to support the technologies of limitless greed and limitless growth.”

—Vandana Shiva, environmental activist

“This book is a must-read for anyone who wants to know the brutal truth of digital colonialism driven by the American Empire. Don’t get deceived by the American tech ‘left’ who is actually funded by billionaires. The true left vision of the future is digital degrowth.”

—Kohei Saito, author of *Slow Down: The Degrowth Manifesto*

“*Digital Degrowth* pulls back the curtain to reveal the starkly naked machinery of imperial wizards and corporations that lack care and compassion. Our collective battles for ‘ecosocialist degrowth’ will reflect war resistance that protects our contaminated lives and challenges corporate extraction preying upon biological, mineral, and spiritual life. This text is a must-read manual for upgrading your security zones.”

—Joy James, author of *New Bones Abolition* and editor of *Beyond Cop Cities: Dismantling State and Corporate-Funded Armies and Prisons*

“Synthetic and encyclopedic, Michael Kwet surveys the landscape of US monopoly power in the global technology sector, traces the capillaries containing the capital and cobalt flowing from core to periphery, periphery to core, required to fuel that power and the way of life it accompanies, and delivers a map to ending it. A must-read.”

—Max Ajl, author of *A People’s Green New Deal*

“As resistance movements around the world evolve, the question of ‘resistance against what and who’ has gained renewed importance. *Digital Degrowth* forces us to look at America’s tech empire critically to inform a new wave of resistance led by today’s youth. Kwet explains the problems clearly and provides solutions that directly impact the climate change debate. It’s a must-read and call to action for activists and activist communities in all sectors of society.”

—Itumeleng Moabi, Fees Must Fall activist and resistance movement archivist
